

# biography

ben boeshans

designer

Ben Boeshans' experience includes a strong background in audio production, electrical engineering technology and the practical realities of live production. Since joining AD in 2010, Ben has tackled a number of complex projects and has become a favorite with clients and project managers for his positive energy and critical thinking skills. Ben's portfolio with AD spans detailed design for high-profile new construction projects to specialized troubleshooting for existing venues.

He began his career as the Head of Sound at the Rozsa Center for the Performing Arts - upper Michigan's largest theatre which hosts several national tours every season. Programming that ranged from classical to contemporary provided a wide variety of performance styles with a multitude of technical requirements allowing Ben to become skilled at crafting solutions to difficult challenges on tight deadlines. Ben brings this real-world creative problem solving to his systems designs.

Ben is a designer in our Dallas office.
