

biography

jeff miller, LEED® AP

senior consultant

Jeff Miller works exceptionally well at developing a big-picture plan for each project he serves. From beginning to end, he is depended on for his talent to integrate varied technologies, research problems and develop solutions. His ability to creatively optimize the architecture of a space while working in conjunction with the design and construction teams make him a valuable asset to every project he serves.

After graduating from Biola University with a degree in Music, Jeff began his career as a recording engineer and equipment maintenance technician. In addition to designing audio systems, Jeff's work soon evolved to project management where he engineered systems for indoor and outdoor venues including educational, performing arts, themed entertainment and worship facilities. Jeff joined Sound Technology Consultants (now Acoustic Dimensions) in 2000, as multi-faceted designer able to work all elements of a project.

As a Senior Consultant for AD, Jeff's background in acoustics, audio, video, lighting, staging and auditorium shaping, allow him to confidently work with clients in developing the best overall plan for the goals of their space. Jeff has led our internal team in the development and implementation of new processes such as IPD, Revit and BIM and also been instrumental in the development of our own budgeting tool. Beginning with Revit 2009, Jeff has been a primary developer of company BIM standards and Revit content.

Recent projects include; USC Catholic Center in Los Angeles, California; Christ Commission Fellowship in Manila, Philippines; Moonlight Amphitheater in Carlsbad, California; and Southwestern College in Chula Vista, California.

Jeff is a member of the American Guild of Organists and also enjoys keeping up on his own musical talent.

education

Biola University
Bachelor of Arts in Music
