

biography

ken andria, LEED® AP

senior consultant

Since joining Acoustic Dimensions in 2005, Ken Andria has been an integral part of the design and implementation of numerous projects ranging from University Schools of Music to Single Family Residences.

His background in architecture has allowed a closer level of collaboration in design between Acoustic Dimensions and architects. Providing an aesthetic eye with an acoustical perspective has resulted in spaces that stay true to an architect's vision while maintaining aural excellence. Ken has most recently led room design efforts on rehearsal and performance spaces for University Schools of Music at Macalester College, Texas A&M Commerce, University of Tennessee Knoxville, Baldwin Wallace Conservatory, Hope College and the Ray Charles Performing Arts Center.

Since starting with Acoustic Dimensions, Ken has contributed to highly acoustically critical spaces for various Broadcast and Production facilities, including National Public Radio, NBC, Home Box Office, Showtime, National Basketball Association, Deluxe Postproduction, MTV, and the Converse Rubbertracks Studios.

Ken holds a Masters of Science in Architectural Acoustics from Rensselaer Polytechnic Institute (2005) and a Bachelors of Architecture from Cornell University (2004).

Ken is a Senior Consultant in the New York office of Acoustic Dimensions
