

biography

matt manis

designer

Since joining Acoustic Dimensions in 2004, Matt Manis has had the opportunity to focus on designing dynamic spaces for assembly and performance. In addition, Matt has been a major contributor to projects such as: MacPhail Center for Music, Delbarton School for Fine Arts Center, and the Mercersburg Academy-Performing and Fine Arts Facility. Matt's previous work with other acoustics firms provided him with substantial knowledge and "hands on" experience with noise control and environmental problems.

As a guitar player for over 10 years, Matt has long been interested in the relationship between architecture and acoustics. Combining Matt's love for music, science, and math, he was inspired to go beyond his Associates Degree in Electrical Engineering Tech to obtain a Bachelors of Science in Mechanical Engineering with an Acoustics Concentration at the University of Hartford.
