## san jose mcenery convention center

**Client:** City of San Jose

**Location:** San Jose, California

**Project Type:** Renovation

**Opening:** 2004

**Construction Cost:** \$1.3 Million

**Contact:** Ken Gong | Project Manager for the City of San Jose | 408.295.9600

**AD Scope:** Audio

The San Jose Convention Center provides over half a million square feet of convention space for the Silicon Valley. Complete with a 22,000 square-foot ballroom, 100,000 square-feet of pre-function space, up to 31 meeting rooms with theatre-style seating and 143,000 square-feet of column-free exhibit space, our work at McEnery Center had to meet many functional demands.

The sound system for this facility includes an all digital, networked audio systems and control systems for each convention space within the venue. Multiple facility equipment rooms are interconnected with fiber-optic cabling that transport a managed network of audio, control and data signals. The San Jose McEnery Convention Center is considered one of the most technologically advanced meeting facilities in the world.

This project was done by Acoustic Dimensions San Diego as Sound Technology Consultants, Inc.
