caruth hall

Client: Southern Methodist University

Location: Dallas, Texas

Project Type: New Construction

LEED® Status: Pursuing LEED® Gold Certification

Opening: 2010

Architect: Hahnfeld Hoffer Stanford

Contact: Bob Ayers | Principal | 817.921.5928

AD Scope: Acoustics | Distributed Video | Classroom A/V | Archival Recording System | Conference Room A/V Systems | Distance Learning System | Lecture Hall A/V

The Caruth Institute for Engineering Education is dedicated to innovative math and science programs and curricula for students from kindergarten through college. Providing a home for the institute's work, Caruth Hall was constructed to LEED Gold Standards and is the new and improved space for teaching, research and innovation. The hall is the third new engineering building constructed on the SMU campus in the last five years and features a new auditorium, seven distance learning classrooms, four teaching labs, conference and board rooms, multi-purpose room, amphitheater, lobbies and offices.

Acoustic Dimensions worked on designs for the entire building including distance learning systems, LCD displays, projection systems, sound reinforcement and playback systems, camera planning and control rooms.
