universal studios citywalk

Client: Universal Studios Development Partners

Location: Orlando, Florida

Opening: 1999

Project Type: New Construction

AD Scope: Sound Reinforcement

CityWalk Orlando is a 30-acre themed entertainment complex within the Universal Studios Florida theme park. CityWalk features a wide variety of live entertainment, themed & fine dining, specialty shops and state-of-the-art cinemas.

AD provided acoustics and sound reinforcement systems design for this project in a design-build partnership with SPLIS. The design included the outdoor Promenade and Waterfront areas linking all of the venues within the complex and with the rest of the theme park. High energy foreground and background music is provided to these areas from centralized control booth. This area also includes an outdoor stage and plaza for live performance.

Our scope of sound systems design work also included performance systems for four of the clubs that are a part of CityWalk: JIMMY BUFFETT'S® MARGARITAVILLE, THE GROOVE, BOB MARLEY -- A TRIBUTE TO FREEDOM, AND CITYJAZZ.
