knight high school auditorium

Client: Knight High School

Location: Palmdale, California

Project Type: New Construction

Seat Count: 800

Opening: 2005

Construction Cost: \$8 Million

Architect: Carmichael Kemp Architects

Contact: Susan McDougal | Principal | 661.533.9000

AD Scope: Acoustics | Audio | Video | Theatrical Lighting

Knight High School was looking for a performance space that allowed for both theatrical productions and music performance. Common for a multi-use facility to have need for both styles, the performing arts department wanted to take it a step further and also provide a venue for educating students. While traditional sound reinforcement, video display and theatrical lighting systems were developed for the theater, the facility also includes small audio and video production control rooms. The result is a venue that provides exceptional training in all areas of audio, video and technical theater.

This project was done by Acoustic Dimensions San Diego as Sound Technology Consultants, Inc.
