lincoln theatre

Client: Lincoln Theatre

Location: Columbus, Ohio

Project Type: Historic Restoration

Seat Count: 566

Opening: 2009

Construction Cost: \$13.5 Million

Architect: Hardlines Design Company

Contact: Laura Piersall | Hardlines Design Company | 614.784.8733

AD Scope: Acoustics | Audio | Video

The City of Columbus has much to celebrate with the exciting re-opening of their historic Lincoln Theatre. The Egyptian Revival-style theatre was built in 1928 and thrived as a major venue for legendary jazz stars such as Dizzy Gillespie, Charlie Parker, James Brown, Miles Davis, Duke Ellington and Sarah Vaughn among others. In the 60's its doors closed and the theatre lay dormant until it was nearly destroyed by the wrecking ball in the early 90's. In 1992 it was added to the National Register of Historic Places. Over the years, money was raised to restore this grand building to its former glory. In addition to the 566-seat main stage theatre with a digital projection system; there is a second floor ballroom for 10 resident arts groups with spaces for auditions, rehearsals, performances and classes and a third floor that will house the Jazz Arts Group's Jazz Academy.

The theatre will also be used as an audio and video recording studio. AD provided basic infrastructure for these systems for future inclusion of the recording equipment. Our scope also included A/V technical systems design for the main stage theatre, entry/lobby and backstage support areas.
