Architect: HGA
Theatre Consultant: Fisher Dachs Associates, Inc.
Organ Builder: Hellmuth Wolff et Associes
Contact: Steve Carrigan | Executive Director | 319.273.3665
AD Scope: Acoustics | Audio Systems

Davis Hall is a flat-floored venue that facilitates both rehearsals and performances through the use of flexible architectural and acoustical elements, including retractable seating risers with integral seating and acoustical curtains. In addition, a removable area of the floor, with steps for additional seating below the elevation of the floor, creates a “raised stage” to formalize the venue for performances.

The space includes a perimeter gallery that accommodates important technical, acoustical and visual functions. The gallery, which can wrap entirely around the performance space, including the platform, also allows additional seating, and is intentionally set at a low elevation to scale down the space.
