

projects

university of baltimore student center

Client: University of Baltimore

Location: Baltimore, Maryland

Seat Count: 200

Project Type: New Construction

Opening: 2006

Cost: \$20 Million

Architect: Murphy & Dittenhafer Architects

Contact: Mike Murphy | 410.625.4674

AD Scope: Acoustics | Auditorium Design Assistance

The top floor of the new student center originally included a small auditorium for multi-media presentations. After completion of Schematic Design, we were asked to explore the feasibility of converting the space into a chamber music recital hall. We recommended that large columns be added to the interior, along with a shelf, wrapping around the room, to overcome with sound focusing effects of the elliptical plan shape. We also recommended the ceiling height/room volume be maximized.

Our recommendations were incorporated into the design with a successful outcome.
