west ranch high school theater

Client: West Ranch High School

Location: Stevenson Ranch, California

Project Type: New Construction

Seat Count: 580

Opening: November 2009

Construction Cost: \$2,075,000

Architect: PMSM Architects

Contact: Vivek Harris | PMSM Architects | 805.925.2421

AD Scope: Audio | Video

The West Ranch High School places high value on the visual and performing arts, and the students there have the talent to back it up. The high school has recently constructed a new performing arts theater to showcase their talents. AD was able to assist the school by providing audio and video consulting. AD recommended a multi-channel sound system with 5.1 surround, a high definition video projection system, and video cameras as well as infrastructure to the campus TV studio for their first-class video production program where the students produce a live daily news show for the campus. The result was the perfect venue for West Ranch High School to showcase their musical performances, dramas as well as their string orchestra of over 55 students.
