miller park

Client: Southeast Wisconsin Professional Baseball District & Milwaukee Brewers

Location: Milwaukee, Wisconsin

Project Type: Renovation

Seat Count: 41,900

Opening: 2008

Contact: John Winborn | VP of Technology & Information Systems | 414.902.4491

AD Scope: Sound Reinforcement

Major League Baseball's Milwaukee Brewers are proud to call Miller Park their home. The state-of-the-art stadium features the only fan-shaped convertible roof in North America, guaranteeing perfect conditions for every game. The ballpark design represents a split-bowl concept where seating levels hang over one another slightly, bringing fans closer to the action on the field.

Acoustic Dimensions was hired to work with stadium management to evaluate and provide recommendations for the betterment of the park's sound reinforcement systems.
