**Contact:** Greg Cain | Technical Director | 619.222.3900

**AD Scope:** Audio Design | Systems EQ

SeaWorld San Diego is one of the world's premier marine adventure parks with 200 acres of world-class shows and attractions. Known for up-close marine animal interactions, each venue is distinctively designed to create an engaging experience for visitors.

Working closely with the technical team, Acoustic Dimensions (formerly Sound Technology Consultants) has been involved in design or renovation of the audio systems for the San Diego venues. Each amphitheater has presented its own unique acoustical challenges. For these venues, AD has used innovative speaker system design techniques to maximize performance and efficiency and optimize the space.
