texan dome

Client: South Plains College

Location: Levelland, Texas

Project Type: Renovation

Seat Count: 3,500

Opening: May 2009

Contact: Dennis Churchwell | Director of Purchasing | 806.894.9611

Installer: Technovations Integration Group

AD Scope: Audio

South Plains College's Texan Dome has recently undergone a major renovation designed to bring the 41-year old facility into the 21st Century. A new lobby, roof, windows, sound system, lighting and a catwalk have been added as part of the renovation.

South Plains College has a thriving Sound Technology and Live Sound programs which engaged in collaboration with AD during design and system optimization. Students and faculty from the programs provided insight to best meet the needs of the Texan Dome and entire campus and engaged at a high level during system optimization and equalization. Teaching and learning opportunities were plentiful during system optimization and final EQ. The Texan Dome floor is seated during Commencement Ceremonies and several other key events each year. An early concept for floor coverage was an exploded mono cluster above the scoreboard. During the collaborative discussions it became clear that a solution utilizing a portable system was more cost efficient because the system could be used to support the major Texan Dome events, a wide variety of other events around the campus, and as a tool for class instruction.
