Cost: \$60 Million

Contact: Brian Powers | Crawford Architects | 816.421.2640

AD Scope: Audio | Broadcast/ENG | Acoustics

Acoustic Dimensions is working with Crawford Architects and the Seattle Seahawks on the new Virginia Mason Athletic Center, a state-of-the-art waterfront training facility located along Lake Washington near Newcastle. The facility will be the second-largest in the NFL allowing the Seahawks to house all of their operation under one roof, including, a year-round indoor practice facility, the team's front office departments, four outdoor practice fields, 50,000 square feet of training facility space, 15,000 square feet of player meeting space and 48,000 square feet of administrative office space. The new facility will also accommodate Corporate Sponsorships and Fan Development that are currently located at Qwest Field and is designed to make training camp open to the public for up to 3,000 spectators per day. The privately funded practice facility will be situated on 19 acres of industrial property and will improve the environmental climate of Renton and its wetlands by improving and redeveloping the site. AD is providing design throughout the facility for acoustics, audio/video, broadcast cabling and paging/intercom systems.
