Contact: David Shanks | Shanks Architects | 972.788.9300

AD Scope: Visualizations | Auditorium Consulting | Acoustics | Audio | Video | Lighting

Acoustic Dimensions provided the design concept for the new auditorium for Cathedral of Praise in Charleston, SC. The U-shaped arena configuration with an elongated thrust stage is designed for maximum impact and connection with the audience.

We also provided 3-D animation and rendering of the circulation, fellowship and education spaces along with the exterior of the building. AD took an active role in supporting the church's leadership team in communicating the project to the congregation.

Shanks Architecture are the design architects for the project. CDH Partners is serving as the architect of record.
