essex alliance church

Client: Essex Alliance Church

Location: Williston, Vermont

Project Type: New Construction

Seat Count: 900

Opening: December 2011

Architect: WPH Architects

Contact: Todd Philippi | Principal | 215.741.3200

AD Scope: Rapid Prototyping | Visualizations

Essex Alliance Church is working with WPH Architects on the development of a new campus in Williston. As part of the new campus, the church is building a 900-seat worship facility. Acoustic Dimensions worked with the church and architects in a rapid-prototyping exercise to interactively develop the interior of the worship center along with associated technologies.

The process allowed the team to fully coordinate the acoustics, audio, video, lighting and staging with architecture and engineering. Ultimately, the team was able to design the interior of the worship center sufficiently to create photorealistic renderings and flythroughs that the church could use as tools to communicate the vision for the space to the congregation.
