## heartland church

**Client:** Heartland Church

**Location:** Irving, Texas

**Project Type:** New Construction

**Opening:** 2011

**Seats:** 543

**Architect:** PSA-Dewberry

**Contact:** Kimberly Ward | Heartland Church | 972.253.4797

**AD Scope:** Auditorium Consulting | Acoustics | Audio | Video | Lighting | Visualizations

This rapid-prototyping exercise for Heartland Church allowed Acoustic Dimensions the opportunity to develop a concept for the interior of the church's new main auditorium.

Video is a huge part of church services at Heartland Church coupled with music - from a full band and worship team of 6-8 people - and drama and dance, playing an important part in the worship experience.

Phase I of the church's master plan includes a centrally-located multi-purpose worship center, of approximately 8300 square feet, that will accommodate 543 worshippers each service. This flexible facility will feature advanced lighting and sound to augment teachings and add ambience. The room will be fully equipped for high level dramatic presentations and musical concerts, in addition to serving students on Wednesday nights.
