## our savior's church

**Client:** Our Savior's Church

**Location:** Lafayette, Louisiana

**Project Type:** New Construction

**Seat Count:** 1,100

**Opening:** 2009

**Architect:** Architects Beazley Moliere

**Contact:** Don Norman | Technical Director | (337) 839-8889

**AD Scope:** Acoustics | Audio | Video | Lighting | Production Accommodations

Our Savior's Church was started in 1998 and in the few years since then, it has grown to over 1500 in regular attendance at multiple campuses. To accommodate its rapidly growing congregation, the church sought a new 1100-seat expandable worship center to serve as the permanent campus in Lafayette.

The new facility needed to have a high level of audio, video and lighting systems to support the church's dynamic praise and worship. Acoustic Dimensions worked closely with the Church and design team to incorporate the acoustical recommendations and technical systems into the architecture. This involved special attention to the unique architectural features, particularly the ceiling which included a center pop-up with windows and an eye-brow over the platform. Accommodations were provided for future expansion into a dedicated video production room when the Church decides to include camera systems for Image Magnification or broadcast to a satellite venue. Hi resolution video was distributed to displays in the lobby, backstage, and throughout the facility.
