Christ's Commission Fellowship in Manila, Philippines is in the process of designing a 750,000 square foot campus to be the permanent headquarters for this explosive church. With ministry goals that involve transforming lives, strengthening families, developing leaders as well as impacting an entire nation, CCF has planned a 7 story worship and training center that will accommodate multiple ministries. Located in the Ortigas district of Manila, CCF brings over 15,000 people together each weekend.

Acoustic Dimensions scope of work on this project involves; acoustical analysis and room design technical systems accommodation, production space planning, sound, video and lighting systems design. The spaces involved in the AD scope include; 8,000 seat worship center, production and control spaces, TV studio, social hall, worship center lobby, rehearsal and choir rooms, 1,500 seat multi-use auditorium, music offices, mechanical rooms and facility-wide AV network.
