christ's church of the valley

Client: Christ's Church of the Valley

Location: Peoria, Arizona

Project Type: New Construction

Seat Count: 3,000 (worship); 1,500 (youth)

Opening: 2004

Construction Cost: \$20 Million

Architect: Todd and Associates

Contact: Gary Gillespie | Audio Director | 623.376.2444

AD Scope: Acoustics | Room Design Assistance | Audio | Video | Lighting | Production

Our work on Christ's Church of the Valley has spanned three phases over a period of nearly a decade. Beginning with the facility and systems design for their 3,000 seat main worship center, our efforts have included campus-wide integrated technical systems for multiple buildings and facilities including a children's ministry building, youth venue, multiuse rooms and production control rooms.

The main worship facility includes large format video displays, production video systems for image magnification, multi-channel sound reinforcement and an integrated theatrical lighting system. This room design has flat-floor movable main seating with fixed stadium seating in the rear sections.

This project was done by Acoustic Dimensions San Diego as Sound Technology Consultants, Inc.
