**Construction Cost:** \$12 Million

**Architect:** LeFler and Associates

**Contact:** Mike Wilke | Technical Director | 661.296.8737

**AD Scope:** Audio | Video | Lighting

The 2200 seat Worship Center at Grace Baptist Church is a state-of-the-art facility designed to support the current campus ministries with the infrastructure to expand with the growth of the Church. This project was designed by Acoustic Dimensions with engineering and installation provided by AMT Systems. The sound system utilizes a Left/Center/Right multi-channel speaker system, digital mixing console and recording systems. The video system is centrally controlled by a matrixed router with seamless outputs feeding a high light output LCD projector on a 26' wide rear projection screen above the rear of the platform and a series of lobby plasma screens. The theatrical lighting system includes both automated and conventional lights. The Grace Baptist hilltop now features an office and classroom facilities, a conference center facility, Worship Center, and outdoor amphitheater.

This project was done by Acoustic Dimensions San Diego as Sound Technology Consultants, Inc.
