rolling hills community church

Client: Rolling Hills Community Church

Location: Tualatin, Oregon

Project Type: New Construction

Seat Count: 2,600

Opening: 2005

Construction Cost: \$17 Million

Architect: Ankrom Moisan

Contact: Paul Osborn | Executive Pastor | 503.638.5900

AD Scope: Acoustics | Room Design Assistance | Audio | Video

The Rolling Hills Community Church worship space is a good example of a project where STC was able to make a significant contribution to the success of the project. As ministry objectives were defined, it was determined that an innovative seating layout would assist in accomplishing the church's goals. While the space was to accommodate seating for 2,600, the desire was to not lose that sense of connectedness.

STC work included designs for production control rooms and studio space as well as the acoustics, video and audio designs for the main worship space. The sound system utilizes a Left/Center/Right multi-channel speaker system with a combination using both line-arrays and a conventional center channel speaker array, digital mixing console and recording systems.

This project was done by Acoustic Dimensions San Diego as Sound Technology Consultants, Inc.
