st. paul the apostle catholic church

Client: St. Paul the Apostle Catholic Church

Location: Chino Hills, California

Project Type: Renovation

Seat Count: 1,500 (worship); 700 (multi-purpose)

Opening: 2005

Construction Cost: \$1 Million

Contact: Philip Arkfeld | Pastor | 909.465.5503

AD Scope: Acoustics | Audio | Video

St. Paul Catholic Church was looking to upgrade all video systems in their existing worship facility including new projectors and production video systems. In addition, an extensive remodel of their divisible multi-use room included all new sound reinforcement, theatrical lighting, video projection and control systems. These systems allow for rooms to be used individually or combined into one large production system. In addition to the remodel of the existing facilities, the church built a new multi-function youth facility that provides a variety of gathering and function spaces. Systems included sound reinforcement mixing and speaker systems, theatrical lighting systems and video projection systems.

This project was done by Acoustic Dimensions San Diego as Sound Technology Consultants, Inc.
