## calvary christian academy

**Client:** Calvary Chapel

**Location:** Ft. Lauderdale, Florida

**Project Type:** New Construction

**Opening:** Spring 2008

**Seat Count:** 700

**Architect:** HH Architects

**Construction Cost:** \$26 Million

**Contact:** Joe Castiglione | Facilities Director | 954.977.9673

**AD Scope:** Acoustics | Room Design | Audio | Video | Lighting | Rigging

Calvary Christian Academy, a ministry of Calvary Chapel of Fort Lauderdale, built a new four-story discipleship building to be used for their secondary classrooms and elective programs. The state-of-the-art facility houses a 700-seat theatre with full fly space, black box theatre, dance studio, choir, band and orchestra rehearsal rooms and classrooms that are designed to be interactive and media-rich.

AD designed the performance systems for most of the spaces in the new facility. The main theatre has two audio systems to allow for the best experience when used for dramatic performance and concerts, while remaining effective for lectures. The theatre is also equipped with automated rigging and theatrical lighting systems, as well as future planning for video projection systems. Video projection systems were needed in the classrooms and music rehearsal spaces. Audio requirements included a speaker system for use with video projection in the classrooms and basic audio playback systems in the dance and music rehearsal rooms.
