**Project Type:** New Construction

**Seat Count:** 3,500

**Opening:** 2004

**Architect:** RVK

**Contact:** Ray Jones | Associate Pastor of Worship and Evangelism | 210.496.5096

**AD Scope:** Auditorium Design | Acoustics | Audio | Video Systems | Video Production | Theatrical Lighting

Senior Pastor Robert Emmitt founded Community Bible Church on May 26, 1990. Since that time, the church has drawn people from all walks of life. They come from many denominational and non-denominational backgrounds. The church has grown to 4,200 in attendance and offers ministries specifically geared to adults, single-adults, college students, children, teens and families. The church is characterized by an energized approach to worship and practical down to earth Bible based teaching. Community Bible Church's new worship center was designed with this in mind.

Stage curtains allow the praise choir and orchestra to leave the stage and join the congregation without interrupting the flow of the worship service. Seating in the worship center is terraced. This allows the room to be scalable in size. By simply roping off the upper seating and dimming the lights in that section, the room acquires a more intimate setting with the remaining seating. Terrace seating also has the added benefit of allowing all congregants a better view of the stage area and easy access to the platform.
