eagle brook church

Client: Eagle Brook Church

Location: Lino Lakes, Minnesota

Project Type: New Construction

Seat Count: 2,200

Opening: 2005

Architect: BWBR

Contact: Bill Berger, Technical Director | Eagle Brook Church | 651.251.0788

Construction Cost: \$15 Million

AD Scope: Acoustics | Audio | Video | Theatrical Lighting | Room Design | Rigging

This site opened in late 2005, and is a larger venue with stadium-style seating, a bookstore, a café, classrooms, and more. It's situated on 92 acres of land next to Peltier Lake, and the church's environmental stewardship team is working on restoring the natural prairie grasses and habitat in the area, making it a beautiful setting for the large windows and open architecture of this 85,000 square-foot facility. This is the location that people who are coming to EBC for the first time often choose, drawing the largest number of attendees each weekend.

This worship space was a part of Phase 1 of their new construction at the Lino Lakes Campus, which also included a backstage space, lobby and basic a/v production control room. The lobby supports the emphasis that the church has on community with distributed audio for background music and paging, and distributed video for announcements and to provide a "window" into what is happening in the main Interim Worship Space. The 400 square foot production control room houses the character generator, switcher, and engineering equipment for the IMAG Systems.
