first baptist church of allen

Client: First Baptist Church

Location: Allen, Texas

Project Type: New Construction

Seat Count: 1,500

Opening: 2001

Construction Cost: \$6.3 Million

Architect: F&S Partners | Ron Shaw, AIA | 214.559.4851

Contact: Jeff Mize | Minister of Music | 972.727.8241

AD Scope: Audio | Video | Acoustics | Theatrical Lighting

The First Baptist Church of Allen wanted a dedicated worship space on their campus. Acoustic Dimensions worked with the church and F&S Partners to identify and clarify the church's priorities for the space, then adjusted some of the room elements and the acoustic signature to better support their worship style. This included lowering the ceiling, providing angled acoustical panels on the rear walls and using a small audio-only control booth on the main floor to minimize seat loss, while video and lighting control are located in the balcony.

The loudspeakers are a left-center-right configuration designed to support both speaking and music with subwoofers located under the platform. Dual rear projection screens flank the stage to provide both sermon and worship support. The lighting system was designed to support a traditional worship style.
