**Opening:** Fall 2010

**Architect:** STH Architects

**Contact:** Jon Marks | Assistant Pastor | 407.425.2555

**AD Scope:** Acoustics | Audio | Video | Lighting | Theatre Design | Visualizations

The First Baptist Church of Orlando have a large worship center that had met its needs for over twenty years, but as the ministry grew and developed, the worship center needed to grow and develop as well.

Acoustic Dimensions worked with the leadership at First Baptist Church of Orlando to brainstorm modifications to the worship facility that would allow the room to better support the ministry for the future. The plans included modifications to the front of house, seating areas, acoustics recommendations and integration of performance technologies.

In conversations with High Construction and STH Architects, Acoustic Dimensions developed the 3-D model, renderings and animations to describe the design concepts and proposed modifications to the room.

This project is a part of the overall campus expansion being led by STH Architects, including the construction of a new commons space that will be used for interim church services during the renovation and then, ultimately, as a community space.
