Construction Cost: \$15 Million

Architect: Beck

Contact: Kip Daniel | Beck | 214.522.8494

AD Scope: Audio | Video Projection | IMAG Production | Acoustics | Theatrical Lighting | Architectural Lighting | Room Design | TV Broadcast Production

First Baptist Church of Wichita Falls is a church with a large emphasis on broadcast but it is still very aware of their live, local congregation. The design of the sanctuary had to balance the needs of the live congregation, the broadcast congregation and the production staff.

Acoustic Dimensions worked collaboratively with Beck from the earliest stages of the design so that the technology is seamlessly integrated into the space. Camera positions, ceiling elements, catwalks, and architectural accommodations for audio, video and lighting were all part of the initial auditorium design.

For example, broadcast lighting typically focuses on even coverage for consistent shot composition. At First Baptist, the architectural lighting is designed so that the live congregation has an enjoyable worship service without feeling they are in a broadcast studio.
