Contact: John Denny, Campus Operations & Ken Dean, Administration | Fellowship Bible Church | 501.224.7171

AD Scope: Acoustics | Audio | Video | Theatrical & Architectural Lighting | Room Design | Production Control

Fellowship Bible Church began in 1977 with 18 individuals and has experienced rapid growth in recent years. As the church body grew, the church's vision for the new facility was to create a place that would stimulate community and foster connection between those attending the different venues while providing a more-visitor friendly environment that allows newcomers the opportunity to experience the hearts of the church members, connecting with them and to one another in the family of God.

The church's new campus is located on 50 acres in west Little Rock and, when all phases are complete, will be comprised of approximately 200,000 sq. ft. with 3 worship centers, children's and youth buildings, recreation space and offices. The three worship rooms provide seating for 2500 people - in addition to the main auditorium, the "Warehouse" venue seats 700 and the chapel seats 400. Each room includes multifunctional elements, such as flat floor seating and stadium seating in the main room. The Warehouse will be used as a contemporary video venue space with band driven worship and will host concerts for local bands.
