Architect: MGA Associates and HH Architects

Contact: Rob Flaherty, MGA Associates, 205.313.3026

Construction Cost: \$7.2 Million

AD Scope: Acoustics | Audio | Video | Lighting

Frazer Memorial United Methodist Church is a church of more than 8,100 members whose mission is to win, disciple and serve. On July 17, 2005, Frazer opened its newest building, which includes the 2000-seat Wesley Hall, a large atrium, bookstore, coffee shop, baptistry and new Children's Ministry facilities. Wesley Hall is now the new home for the church's Contemporary Worship services and is ideal for concerts, plays and seasonal musical/drama productions.

AD was contracted to provide ceiling and wall shaping design details, recommendations for fixed sound absorbing materials and for acoustical treatments and shaping in the platform area, sound isolation recommendations and design for noise control. We also designed the audio, video production system, theatrical and architectural lighting, curtaining systems and audio, video and lighting for the "Surge" and "Discoveryland" children's theatres.
