Project Type: New Construction

Seat Count: 2,700

Opening: 2010

Cost: \$19.7 Million

Architect: CDH Partners

Contact: Mark Ramsey | Minister of Media | 205.631.8791

AD Scope: Acoustics | Audio | Video | Lighting | Auditorium Design

Gardendale's First Baptist Church new worship center is Phase 1 of a three-phase building plan and includes the 2,700 seat worship center that is designed for future expansion. Worship is key at Gardendale's First Baptist Church. The church designed the new space so that all 3,500 people that attend their two worship services would feel a part of the experience and have a sense of togetherness. In addition to serving as a worship center, the new building has educational space for young singles and senior adults and a nursery.

We were contracted to create the conceptual design for the auditorium and for the preliminary design of the acoustics and technical systems. We worked with the church and the architect to develop a room with wrap around seating which will provide visual community and proximity to the stage. The acoustics design creates an audible sense of intimacy in the room.
