AD Scope Acoustics | Room Design Assistance | Audio | Video | Theatrical Lighting

Hebron Baptist Church, in Dacula, Georgia, between Atlanta and Athens, has the unique position of being located in one of the fastest growing areas of that state. The town was incorporated in 1905 and has a population of 3,848 - the new Hebron worship center can accommodate every resident of the town with seating for 3,885. The worship facility of Hebron Baptist Church stretches across 150,000 square feet and was paid for when it held its first worship service March 19, 2006.

The front doors of the worship center open up into a large foyer or atrium where worshippers' attention is immediately drawn to a beautiful mural situated above the entrance to the auditorium. The building is equipped with theater-type seating, two 15' by 20' screens and elaborate control rooms for audio and video monitoring and production.

AD designed the room acoustics, sound reinforcement system, video projection system, full video production facility, audio production room, theatrical lighting and lighting for IMAG, distributed Displays, and assisted with the acoustics and audio consulting for the choir rehearsal room.
