Opening: April 2003

Architect: HH Architects

Contact: Steve Stroope | Senior Pastor | 469.698.2200

AD Scope: Acoustics | Audio | Video | Distributed A/V | Theatrical Lighting | Architectural Lighting

The new Pier 419 at Lake Pointe church is a facility for cutting edge youth ministries. Over 1,000 students per week experience vibrant worship and teaching relevant to their daily lives. Those students, in turn, are having a positive impact on their friends in dozens of schools and around the world through yearly mission trips.

The innovative design includes an 800-seat auditorium and ample classroom space. Recreation features include a pair of three-on-three basketball cages, a skate park and a café. Other seating areas provide an environment that encourages conversation and relationships.

Because of the progressive ministry style of the church, the performance technology in the space required a high-degree of flexibility, integration, and planning for the future. EAW MQV2364 speakers provide concert quality support for high-energy youth worship. It's an alternating left-right system with dual 15" subwoofers providing impact to the system.
