Opening 2008

Construction Cost \$14 Million

Architect pb2 & David Shanks Architecture

Contact Scott Lehman | Prestonwood Baptist Church | 972.820.5000

AD Scope Acoustics | Audio | Video | Lighting

Prestonwood Baptist Church in Plano, Texas has expanded their ministry to a second location in Prosper, Texas - an area, North of Plano, that is rapidly being transformed from farmland into a vibrant, growing community. Their desire has been to provide the same programs as the main campus while completing construction with zero debt, requiring that the campus be built in phases. Phase one includes a 1,500-seat worship center, a youth activity room, two large children's worship rooms and an Awana room. AD designed distributed audio and MATV systems for use throughout the facility and a basic A/V studio to support production for IMAG and systems to support bi-directional communication between the North and main campuses.

Teaching at Prestonwood North can be transmitted from the main campus to a screen that shows the speaker head to toe with IMAG flanking the stage. It can also accommodate a live teaching pastor, allowing the teaching to be transmitted back to the main campus in Plano.
