**Opening:** Nov 1999

**Architect:** HH Architects

**Contact:** Rodger Hodges | Worship Leader | 806.335.8955

**AD Scope:** Acoustics | Audio | Video | Platform Design | Theatrical Lighting

Trinity Fellowship Church in Amarillo has completed an expansion and remodeling project, which includes a new family life center, a 1,750-seat worship center, administrative offices and a nursery wing.

The floor of the sanctuary is flat with moveable seating to allow the sanctuary to be converted to other use when a larger, permanent facility is completed in the future.

Worship at Trinity Fellowship Church is high-energy, celebration music. The platform is designed to be acoustically absorbent so that there is no spill of sound from the platform into the seating area. However, the ceiling above the choir is reflective so that sound is directed back into the choir and they can hear themselves sing.

AD is currently working with the church on plans for a new expansion project.
