valley baptist church

Client: Valley Baptist Church

Location: Bakersfield, California

Project Type: Renovation

Seat Count: 2200

Opening: 2006

Contact: David Kalahar | Valley Baptist Church | 661.387.6309

AD Scope: Audio

Valley Baptist Church brought Acoustic Dimensions on board to renovate their sound system after making the decision to transition to a more contemporary worship program and to begin broadcasting services.

Having worked with Dave Kalahar before when he was the Technical Director for Highview Baptist Church our team was eager to help Valley Baptist move toward achieving their goals. As with any renovation, there are challenges and our design for the new sound system required installing an EAW KF761 system installed behind their existing grill cloth structure. Space was really tight, and Pacific West Sound (the sound contractor) did a fabulous job with their engineering and rigging to get the speakers to fit.
