AD Scope: Acoustics | Theatre Consulting | Audio | Video | Distributed A/V | Video Production for IMAG | Lighting

World Outreach Church has had a tremendous history of growth with 15-20% annual increases in membership. This growth required a campus expansion that has added approximately 125,000 square feet to their facilities and includes a new 2,500 seat sanctuary, lobby, nursery and preschool areas, administrative spaces, IT Center that will serve as the video production space, back of house and expanded support spaces, a meditation garden and a chapel.

The church uses multiple venues for simultaneous worship services on the weekends. Acoustic Dimensions' scope included audio, lighting and the infrastructure and equipment needed to support the video venues on the current campus and IMAG in the new Sanctuary.
